Nandini G V

BCA Student · AI & Machine Learning | Bengaluru, India
+91-9019061560 | nandininandinigv@gmail.com

SUMMARY

BCA student specialising in AI & ML with hands-on experience building end-to-end predictive models for healthcare applications. Skilled in Python, Scikit-learn, Pandas, and NumPy. Seeking an entry-level ML/AI or data role to deliver impactful, real-world solutions.

TECHNICAL SKILLS

Languages	Python
ML / AI	Logistic Regression, Classification, Supervised Learning
Libraries	Scikit-learn, Pandas, NumPy
Techniques	Data Preprocessing, Feature Normalisation, Model Evaluation (Accuracy, Precision, Confusion Matrix)
Other	HTML (Certified), CLI Development

EDUCATION

BCA – AI & ML 2023–Present
Govt. First Grade College, NES · CGPA 7.5

Class XII · CBSE 2023
Score: 70%

Class X · CBSE 2021
Score: 55%

CERTIFICATIONS & ACHIEVEMENTS

- HTML Assessment Certification
- Top 10 in class – BCA programme
- Top 10 in class – School

LANGUAGES

English, Kannada (R/W/S) | Hindi, Telugu (Spoken)

INTERNSHIP

Machine Learning Intern Jan–Mar 2024
MifraTech Pvt Ltd · Bengaluru

- Built an end-to-end **Heart Disease Risk Prediction** system using Logistic Regression, achieving **85–92% accuracy** on 303 patient records.
- Engineered the full ML pipeline — ingestion, imputation, normalisation, training, and evaluation — using Python, Pandas, NumPy, and Scikit-learn.
- Validated model with accuracy score, precision, and confusion matrix before delivery.
- Developed a CLI for real-time risk prediction, enabling non-technical users to interact without code.
- Collaborated cross-functionally, gaining exposure to industry ML workflows and code review.

PROJECT

Heart Disease Risk Prediction Feb–Mar 2026
Academic ML Project · BCA (AI & ML)

- Designed a supervised classification model achieving **85–92% accuracy** on a 303-record medical dataset.
- Executed complete preprocessing pipeline: missing-value handling, feature normalisation, and data quality checks.
- Evaluated model using precision, recall, and confusion matrix; justified Logistic Regression for binary classification.
- Built an interactive prediction interface accepting patient vitals and returning real-time risk scores.
